Dear User:

Thank you very much for use our Bluetooth Cellphone Call Recorder Earphone ,please read through this instruction carefully before use in order to understand how to operate.

## 1 How can we charge ?

When you first time use our earphone ,please charge it first ,just use a micro USB cable to connect earphone and a adapter( DC 5V output) to charge, **blue light** ☀ is on when charging ,blue light is off when fully charged ,this process will takes max to 2 hours!

## 2 How to adjust Volume ?

Hold "Next" 📶 button for 3 seconds for Volume down function , it is means lowest level when you hear a "Dee" sound

Hold "Previous" 📶 button for 3 seconds for Volume up function , it is means highest level when you hear a "Dee" sound

## 3 Turn on and turn off WT-RS1 earphone

Hold answer button for 3 seconds ,you will hear a system voice "Power on"

Hold answer button for 3 seconds ,you will hear a system voice "Power off "

#### 4 Connect with Bluetooth

When earphone is power on , **blue light**  flash fast means bluetooth is ready ,you only need to turn on your Bluetooth on your phone ,and find “WT-RS1” to connect,no need password ,you will hear the system voice “Connected ”if connect successfully.

**Note:**If you did not connect the Bluetooth in 60 seconds after earphone power on , earphone will turn off automatically.

#### 5 How to achieve bellow function after connect Bluetooth

★ Answer or Hang up call: Press the “Answer button” once

★ Automatically record call conversation function

- Normally factory will set up the Automatically record call conversation function on before ship out,it is means that any conversation of your phone will be record as long as Bluetooth is connected !

- **Note:**If you do not need record automatically ,please inform us before delivery .

★ Live record function

- Turn on/off Live Record Function : Hold Record Button for 3 seconds, you will hear a system voice “ding”and **red light**  flash slowly, then earphone is recording sound,press the record button again to stop recording.

★ Listen recorded audio file

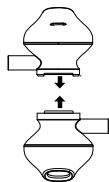

- Simply press the Record button once to listen recorded file,you can press “Next” or “Previous” to find the audio file you want to listen, press again to stop listening.

#### 6 Copy recorded audio file

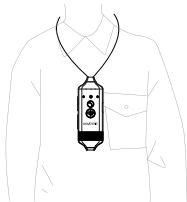

- Use Micro USB cable to connect with computer ,then copy audio file to the drive of earphone in computer.

## 7 Find a way to wear earphone

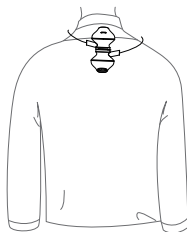

- Hang in neck : Put two Earbuds together via magnet,then put on your neck,as bellow photos:

①Mangnet

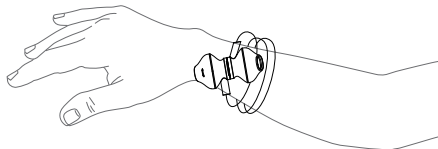

②Front side looking  
when hang in neck

③Reverse side looking  
when hang in neck

- Put on your hands:Wrap earphone to your hands and put two Earbuds together via magnet ,as bellow photo:

## 8 Time update

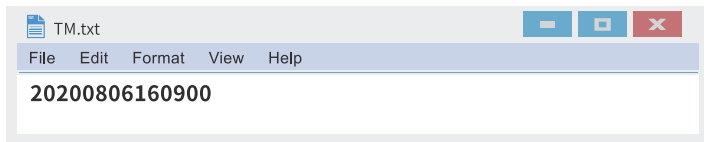

### 1. Create a TM.TXT document to update time

- Create an new document in computer and change the name to "TM.txt"(like bellow photos)

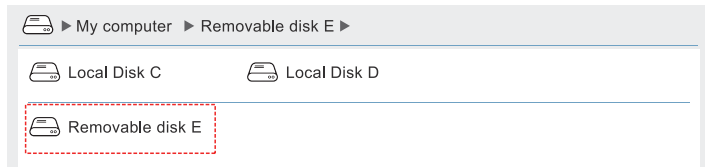

TM.txt

- Open the document and enter:Year 、 Month、 Date、 Hour、 Minute、 Second,and then save it .For example:if you enter 6th,August,2020, 4:09 pm ,you can write like bellow photos:

- Use USB cable to connect with earphone, and copy the document into earphone drive .(as bellow photos )

- Disconnect with computer ,then set successfully

## FAQ

| Question                                                                                 | Answer                                                              |
|------------------------------------------------------------------------------------------|---------------------------------------------------------------------|
| Why can't i find the recorded file ?                                                     | <b>System will delete record file when memory is less than 30MB</b> |
| Why the record audio file is not distinct                                                | The voice resource might not clear, need to check                   |
| Why can't i see show the Battery Remaining Capacity of earphone after enter Mini Program | Bluetooth might not connected                                       |
